

DOXFOAM F82
WATER BASED DEFOAMER

DOXA
CHEMISTRY ENVISIONED

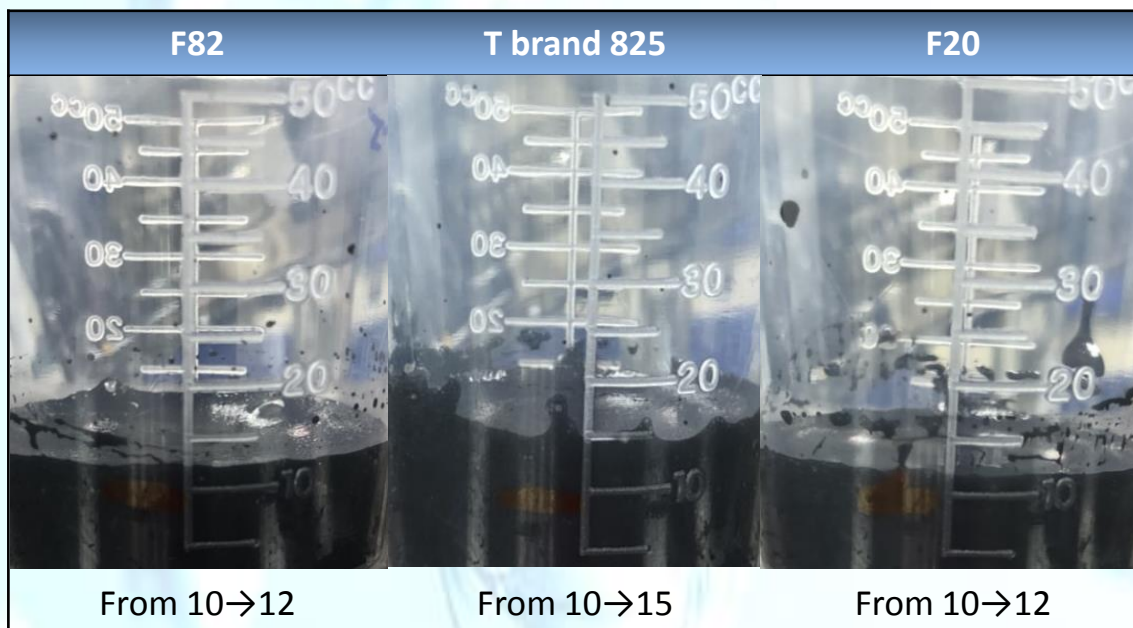

Product Intro

Doxfoam F82 is a modified polysiloxane defoamer which achieves quick and effective deaeration. F82 has an outstanding compatibility and hence can avoid surface defect as commonly introduced by the adding of defoamer.

Specification	
Active content	26%
solvent	water

Anti-foaming Property

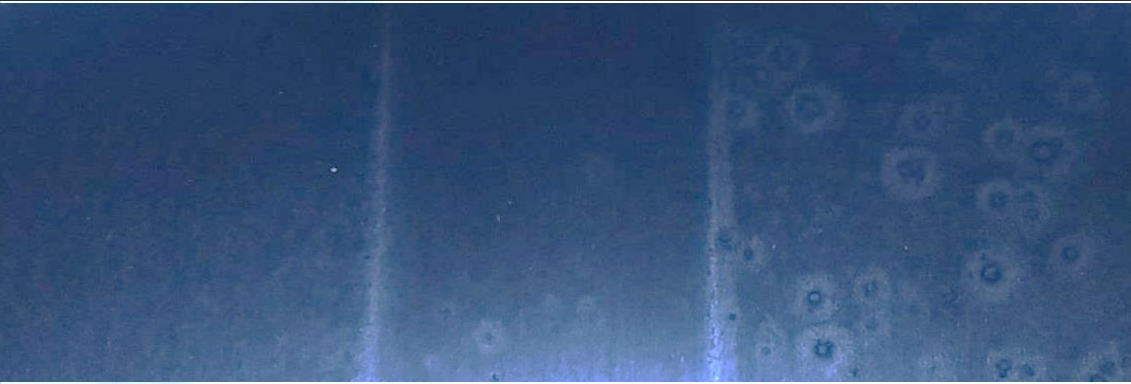

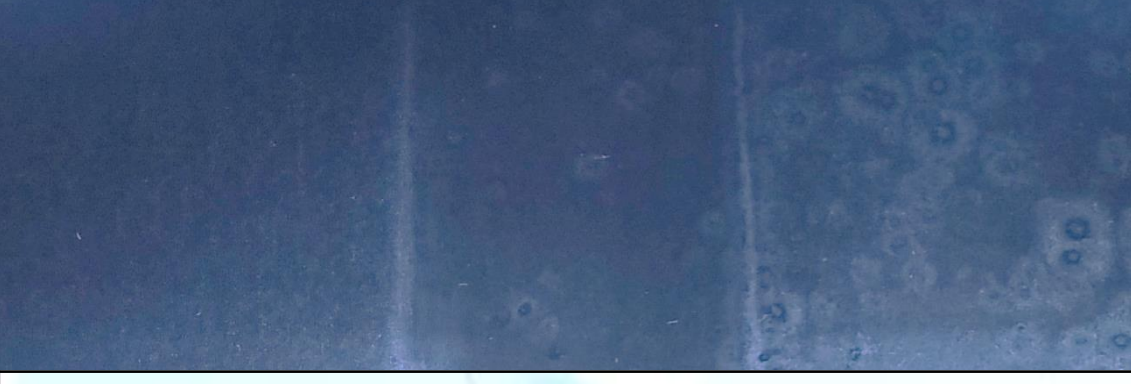

Add 0.5% defoamer into color paste. Pour the paste into the tube to the 10 cc mark. Stir the paste for 3 mins and observe the height increase.

★F82 and F20 have better Anti-foaming effect

Compatibility Test

Check the craters on the film at various dosages.
